

China seeks innovative technologies

Explore business partnerships with ICUK

With the ever-increasing development of Chinese industries, the demand for a wide range of technologies is booming. As a non-profit, government funded UK organisation with strong links into Chinese governments and industries. Innovation China UK (ICUK) is searching for close-to-market UK technologies which are in high demand in China. Through our own events or those organised by our Chinese partners, our aim is to help UK technologies become more widely available to Chinese companies.

ICUK offers valued-added services to help UK companies in commercially exploiting their technology in Chinese market. Through our experience of funding and partnering over 70 joint Proof-of-Concept research projects between UK and Chinese Higher Education institutes, the ICUK has the necessary contacts and know-how to help technology businesses find commercial partners in China.

Our strengths lie in:

- Strong support from China's central and local governments. Direct access to contacts at governmental and organisational levels – highly useful in a country with top-down systems.
- Experience in building technology research partnerships between UK and Chinese Higher Education Institutes. ICUK has worked with at least 50 Chinese institutes and over 80 Chinese companies in focused technology areas.
- Strategic collaborations with several public-funded technology transfer organisations in China covering the majority of technology-focused regions.
- A team of UK-based, bi-lingual project managers experienced in R&D and commercialisation in both China and the UK. In addition to the UK team, a Beijing-based ICUK Coordinator ensures a smooth project execution in China.
